

Our Office Statement on Covid-19/coronavirus and Telehealth.

We have been told for weeks now that a compromised immune system can cause a viral infection or any type of infection, to become more dangerous and lead to critical complications.

*Now more than ever, It is critical that we **ALL** maintain our healthy lifestyle and **optimize our immune system**. That is exactly what a functional/holistic approach is designed to achieve, and what my practice has been dedicated to for the past several years.*

If you or a loved one needs to improve their health and immune system, NOW is the time.

Reach out to my office. We can help.

As of now, we will still be seeing patients in the office one on one. This may change at any time. Because we are a small office, we can maintain cleanliness and only have one patient in the office at a time. No one with a fever or respiratory symptoms will be seen in office.

For those of you who do not want to come to the office or are feeling ill, we will be conducting consultations virtually via phone or Healthie Telehealth. This a medically approved, HIPPA compliant software that ensures your privacy.

Either way, we are ready to help you begin a comprehensive/holistic program to improve your health and optimize your immune system. Take the first step to restore your health by clicking on the Discovery Call tab below. Let's start the conversation.

We want to keep our community safe. We urge our clients to practice good hygiene, maintain healthy habits, and stay vigilant.

In Health,

Dr. C
